

GOLD

Pick your metal, as here's the ultimate jewellery bout. Carrie K. gold takes on Carrie K. silver.

"As good as gold"

"Gold – always believe in your soul"

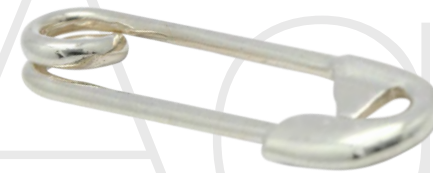

"Nearly 40% of all gold ever mined has come from 'the Rand' – the Witwatersrand Basin in South Africa. It's produced more than 1.5 billion ounces."

SILVER

"Silver used to be embedded in the lenticular screen used to watch black and white movies, hence the term 'star of the silver screen'. It's seeing a resurgence again as it's ideally suited for 3-D film projection."

"Every cloud has a silver lining"
